Technical Lead | Backend Architect | Node.js | Golang | Distributed Systems

Technical Lead with **8+ years** of experience designing, building, and scaling enterprise-grade fintech and BFSI platforms using **Node.js, Go (Golang), React.js, PostgreSQL, Redis, Apache Kafka, and Kubernetes**. Proven expertise in architecting **distributed microservices, event-driven systems, multi-tenant SaaS platforms**, and high-volume transactional applications across cloud and on-premises infrastructure. Experienced in leading engineering teams, driving architecture decisions, optimizing database performance, and implementing secure, highly available production systems using modern DevOps practices.

SKILLS

Languages JavaScript, TypeScript, Go

Frontend React.js, Angular, React Native, Redux, Next.js

Backend Node.js, Express.js, Fastify, Hono.js, NestJS, GraphQL

Databases MySQL, MongoDB, Redis, Valkey, PostgreSQL

Cloud & DevOps AWS, Docker, Jenkins, Rancher, GCP, GitHub Actions, Kubernetes

Messaging Systems Kafka, RabbitMQ

Testing Jest, Mocha, Cypress, React Testing Library

Blockchain Solidity, Web3.js, Ethers.js

Observability & Monitoring OpenObserve, Prometheus, Grafana

Authentication & Security JWT, Argon2, OAuth 2.0, RBAC

Code Quality & Tools SonarQube, Git, GitHub

Payment Integrations Stripe, Razorpay

Architecture Microservices, Distributed Systems, Event-Driven Architecture, Multi-Tenant SaaS, REST APIs, GraphQL, System Design, Domain-Driven Design (DDD), Embeddings

AI & LLM Ollama, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Search, GitHub Copilot, Cursor, Claude Code

EXPERIENCE

First Credit Services

Mumbai, India • 01/2026 – 07/2026

Technical Lead

- Leading the v2 re-architecture of a large-scale credit lending platform using the **PERN stack**, modernizing legacy applications into scalable domain-driven microservices.
- Architected an **event-driven microservices architecture** using Apache Kafka for loan origination, underwriting, repayment processing, and reliable asynchronous inter-service communication.
- Designed and implemented a **multi-tenant architecture**, storing tenant configuration in PostgreSQL while using Redis for low-latency tenant configuration caching, reducing database lookups and improving request performance.
- Leading a team of 6+ engineers across architecture, sprint planning, code reviews, technical mentoring, release management, and engineering standards.
- Built and managed hybrid infrastructure across **AWS EKS** and **on-premises Kubernetes clusters**, reducing infrastructure costs while implementing centralized observability using OpenObserve.
- Built an **AI-powered RAG** assistant using **Ollama, pgvector (PostgreSQL Vector Database), Embeddings**, and **Internal REST APIs**, enabling customers to securely retrieve **Account Balances, Loan Information, FAQs**, and raise **Support Tickets** through a conversational interface.

Periscope Technologies

Mumbai • 07/2025 – 01/2026

Technical Lead

- Architected a **multi-tenant SaaS platform** for stock broking using Go, Node.js, PostgreSQL, Redis, Apache Kafka, and Kubernetes with domain-driven microservices.

- Designed an event-driven architecture using **Apache Kafka** and implemented the **Transactional Outbox Pattern** for reliable event publishing and fault-tolerant distributed communication.
- Designed a centralized **multi-tenant architecture** using PostgreSQL, PgBouncer for connection pooling, and Redis for low-latency tenant configuration caching, supporting scalable tenant isolation.
- Developed secure authentication and authorization using JWT, Refresh Token Rotation, Argon2 password hashing, TOTP-based MFA, RBAC, and Redis-backed session management.
- Established engineering standards, CI/CD pipelines, Kubernetes deployments, production monitoring, code reviews, and mentoring practices across engineering teams.

ETeam InfoServices Private Limited
Mumbai, India • 09/2024 – 01/2025

Senior Software Developer

Note: Role concluded due to company-wide restructuring and budget optimization.

- Developed scalable backend microservices using **Node.js, Go, PostgreSQL, and Apache Kafka** for enterprise insurance and real estate risk management platforms.
- Designed asynchronous event-driven workflows using **Kafka** for policy processing, property assessments, and inter-service communication.
- Automated CI/CD pipelines using **GitHub Actions** and deployed containerized applications on **Kubernetes (Rancher)** with Docker.
- Designed secure **REST APIs** and optimized backend services following **microservices architecture**, improving maintainability, scalability, and production reliability.
- Collaborated with cross-functional engineering teams to deliver enterprise-grade applications following microservices architecture.

SMFG India Credit
Mumbai, India • 06/2023 – 09/2024

Senior Software Developer

- Modernized lending platform services using **Node.js, React.js, Angular, PostgreSQL, Redis, and RabbitMQ**.
- Designed and developed a **configuration-driven API Gateway** using **Go**, enabling centralized request routing, authentication, rate limiting, and dynamic service configuration for backend microservices.
- Led the migration of asynchronous messaging from **RabbitMQ to Apache Kafka**, improving scalability, throughput, fault tolerance, and event-driven communication across distributed services.
- Optimized PostgreSQL queries, indexing strategies, and database access patterns to improve application performance for high-volume financial transactions.
- Built customer-facing loan management applications and internal operational dashboards.

HCL Technologies
Mumbai, India • 09/2022 – 06/2023

Senior Software Developer

- Developed enterprise-grade applications using **Node.js, Express.js, React.js, GraphQL, and Redis**, designing scalable APIs and optimizing backend services for high-volume content processing.
- Improved application performance through **Redis caching**, reusable React components, and backend optimizations, while collaborating on production deployments and performance tuning.

Vernost Marketing Technology Solutions Pvt. Ltd.
Mumbai, India • 09/2021 – 09/2022

Software Developer

- Developed business applications using **Node.js, Express.js, Angular, and React**, building reusable REST APIs and scalable admin dashboards for internal operations.
- Optimized application performance using **Node-cache**, modular backend architecture, and reusable frontend components to improve responsiveness and maintainability.

Blockworks Technologies Pvt Ltd
Mumbai, India • 06/2020 – 09/2021

Software Developer

- Developed secure **Ethereum smart contracts** using **Solidity** and built decentralized applications (dApps) with **Web3.js, Node.js, and React.js** for blockchain-based financial platforms.

- Integrated **Stripe**, **PayPal**, and cryptocurrency wallet connectivity while designing backend APIs and dashboards for digital asset management.

Dealmoney Securities Private limited
Mumbai, India • 07/2018 – 04/2020

Software Developer

- Developed an **internal Loan Management System (LMS)** for operations teams, enabling efficient loan processing, customer management, repayment tracking, and administrative workflows.
- Designed and implemented **RESTful APIs** using **Node.js**, **Express.js**, and **Redis**, deploying applications on self-managed infrastructure for stock trading platforms.
- Developed **React.js** dashboards for traders and internal administrators while optimizing backend performance through caching and API improvements.

ACHIEVEMENTS

- Led multiple platform modernization initiatives from monolithic architectures to event-driven microservices.
- Designed and deployed production systems on AWS and on-premises Kubernetes infrastructure with high availability.
- Built scalable event-driven architectures using Kafka, PostgreSQL, Redis, and RabbitMQ for fintech platforms.
- Mentored engineering teams, established coding standards, and drove architecture reviews across multiple projects.

EDUCATION

B.E in Computer Engineering

University of Mumbai • Mumbai, India • 08/2014 – 06/2017

Diploma in Computer Technology

MSBTE • Mumbai, India • 07/2010 – 05/2014
